(54) RECORDING LIQUID

comprises (A) a polymeric compound e.g. acrylic acid-styrene copolymer, (B) a compound e.g. alkali metal which forms a salt with the component (A), (C) an aqueous liquid medium e.g. n-propyl alcohol, (D) a pigment e.g. an azo dye and (E) an agent for dry to touch consisting of one or more compounds selected from 1-ethynyl-1-hydroxycyclohexane, 4-ethynyl-4-hydroxycyclohexanone, 4-ethynyl-4-hydroxypiperidine, 3-ethynyl-3-hydroxypyrrrolidine and 5-ethynyl-5-hydroxy-1,3-cyclopentadiene.

(57) Abstract:

PURPOSE: To obtain a recording liquid capable of high speed printing, excellent in quick-drying, water resistance and light-resistance and suitable for ink-jet printing, etc., by compounding a polymeric compound, a compound forming a salt with the polymeric compound, an aqueous liquid medium a pigment and a specific agent for dry to touch.

CONSTITUTION: This recording liquid
